Mental health and university

The Life Patterns program has identified stress as a major contributor to student’s poor mental health

Financial hardship and stress

- “Between doing 20 contact hours at uni plus that at work as well as a good 20-30 hours outside uni study a week, my body is exhausted and mentally it feels like uni is overtaking my life and may not be worth all this. I can’t work less hours as I am saving.” Woman, metropolitan area, year: 2010.

- “Uni work and money issues stress me out. Centrelink Youth Allowance does not pay enough to cover rent, bills, car needs, medical or dental, but uni hours and work requirements don’t allow time to work.” Woman, regional area, year: 2010.
Friends and family are a crucial resource

But

The impact of mixing work and study means that young people find it difficult to find regular periods of shared time to maintain close relationships and to build new acquaintances into deeper friendships.

Looking back at hopes you had in school, how satisfied are you with the way things have turned out, by ‘very satisfied’, aged 25, (C1) 1998 & (C2) 2013, (%)
